In order to make sound decisions concerning the future of Iowa lakes, it is important to understand how the lakes are used, as well as what factors influence your selection of lakes to visit. The answers you give to the questions in this survey are very important. Even if you have not visited any lakes in Iowa, please complete and return the questionnaire. It is critical to understand the characteristics and views of both those who use and those who do not use the lakes.

In this first section, we would like to find out which of the lakes on the enclosed map you visited and what you did there.

- Please indicate how often you or other members of your household visited each of the following lakes in the current and past year. Also, indicate the number of trips you anticipate making to each of the lakes in 2003. If you have not visited any lakes in Iowa, and do not plan to visit any in the upcoming year, please check this box and skip to question 2.
 - I have not, and do not plan to visit any lakes in Iowa

If you visited lakes in Iowa that are not on this list, please count them in the “other” category at the end of the list (page 7).
